

kl. 3 a angielski zawodowy

Wtorek, 23.06, lekcja 8 i 9

Temat: Welding equipment

Temat: Car processes

1. Połącz procesy (1–6) z ich opisami (a–f):

1 soldering

2 brazing

3 leading

4 welding

5 tinning

6 cutting

a Bonding by melting a soft metal to the surface of pieces to be joined.

b A soldering process, where the surface of a metal is coated with solder.

c Work is heated to melting point and beyond, and “cut” by oxidizing metal.

d Similar to soldering, but uses a higher temperature to fuse the filler metal to the work pieces.

e A form of soldering; solder is used to fill in the surface of metal.

f Joining two similar work pieces by melting them together

2. Uzupełnij tekst podanymi wyrazami:

ignition gear engine spin flywheel powerful

The starter motor The starter motor is a..... electric motor, which turns the..... over until it starts. On most starter motors, when the.....key is turned to the start position an electrical conductor moves the starter.....into engagement with a toothed ring fitted to the outside of the engine's..... . Power is then supplied to the motor to..... the flywheel until the engine starts.
